6.07 GREAT LAKES - Great Lakes Article 13 Rights are governed by the 2000 Consent Decree and corresponding Regulations of the Chippewa-Ottawa Resource Authority (CORA). The 2000 Consent Decree applies to the Great Lakes and the connecting waters of the St. Mary’s River, and specifies two types of non-commercial fishing in the Great Lakes.

D. Recreational Fishing - Tribal members may engage in recreational fishing activities in the 1836 Treaty waters of the Great Lakes in conformance with State recreational fishing rules without a license, so long as the Tribal members have a membership identification card in their possession. Tribal members in possession of a Tribal inland fishing license may follow the seasons, bag limits, and size limits for the species listed in Table 1, provided that legal methods of harvest include hook and line, spears, bow fishing equipment, dipnets and seines. Any other netting will be regulated under Subsistence Fishing below.

E. Subsistence Fishing - Tribal members must obtain a Great Lakes subsistence fishing license from the Tribe if fishing activities in the Great Lakes and St. Mary’s River include netting, spearing or other activities not authorized by State recreational fishing rules. Subsistence fishers may not possess more than one hundred (100) pounds round weight aggregate catch of all species. Subsistence fishing in the Great Lakes with gill nets or impoundment nets requires a Tribal permit; and subsistence gill netting is limited to one (1) net of three hundred (300) feet or less per vessel per day, except that in the St. Mary’s River the limit is one hundred (100) feet in length. See the 2000 Consent Decree (Sections V and XII) and corresponding CORA Regulations for other applicable restrictions.

SECTION 7: SEASONS AND BAG LIMITS

7.01 See Table 1 (Centerfold) for General Fishing Regulations Summary.

7.02 See Table 6 (Page 47) for Specially Regulated Fisheries Summary.

7.03 Maps and Descriptions of Regulated Fishing Locations (Pages 16-42) are intended to support Tables 1 and 5 in further defining the Regulations and requirements for the harvest of particular species during seasons normally closed to fishing.

SECTION 8: BIOLOGICAL ASSESSMENT AND MONITORING

8.01 Biological Assessment. The Natural Resource Department may require that fur bearers, Gaachiinhi-Eweesi’ek (small game), M’didaa-E’weesi’ek (big game), migratory birds, fish, reptiles, amphibians or the habitats of any of them within the Ceded Territory be subject to reasonable biological assessment. The purpose of such assessment is to insure long range management of these species and their environs, or changes to the existing Regulations or any future Regulations as necessary to foster such preservation and management.

8.02 Assessment Permits. The Natural Resource Department may authorize a Tribal member to assist with or perform an assessment to assist the Tribe in gathering natural resource data to better help manage the resource more effectively. The Tribal member will be required to have a valid Tribal License and have in his/her possession at all times a duly authorized assessment permit while conducting such assessment.

8.03 Scientific Collectors Permit. The Natural Resources Department may issue its employees collector's permits for the purpose of conducting biological assessments.

8.04 Monitoring. It shall be the duty of the Tribal biologist to monitor all take and harvest of E'weesi'ek (game), fish, fur bearers, migratory birds, reptiles, amphibians, plants and the natural growth through the receipt of catch reports, through E'weesi'ek (game) bag checks, patrols, jawbone retrieval and mail surveys.

8.05 Emergency Action. The GTB Natural Resources and Environment Committee (NREC) may take or enact emergency measures in order to preserve the rights or resources of the Tribe and its members. This may include but not be limited to shortening or closing seasons, reducing bag limits and/or similar methods. The NREC and NRD will make efforts to coordinate emergency actions with the Tribes, State, and federal government as needed to preserve rights or resources.

8.06 Technical Amendment. The NREC may make technical amendments to this document as needed for the protection of the resources addressed herein.

The member should direct the appropriate Tribal authority to the place where the carcass was found. A conservation enforcement officer shall take a sworn statement from the Tribal member regarding the circumstance under which the carcass was found. If the conservation enforcement officer or appropriate Tribal authority is satisfied that the Tribal member was in no way involved in the intentional taking of the animal, the Tribal member may either keep the carcass or any part of it for spiritual practices or donate it to the Tribal repository, provided such action does not violate any applicable federal law.

9.04 To the extent determined permissible under applicable federal law, the Tribe may maintain a repository to keep parts of eagles, hawks, furbearers, and any protected species either taken in violation of these Regulations or other applicable Tribal law. Tribal members may request in writing animal parts from the repository for spiritual practices. The Tribe has developed regulations to process such requests so that items in the repository can be distributed to Tribal members in a fair and efficient manner. The Tribe may issue possession licenses if needed to protect Tribal members from non-Tribal law enforcement agencies.
